In your email after I've sent - there should be an email from me - Click on Accept Invitation

Github main page after you sign in with your new account (mine looks a bit different)

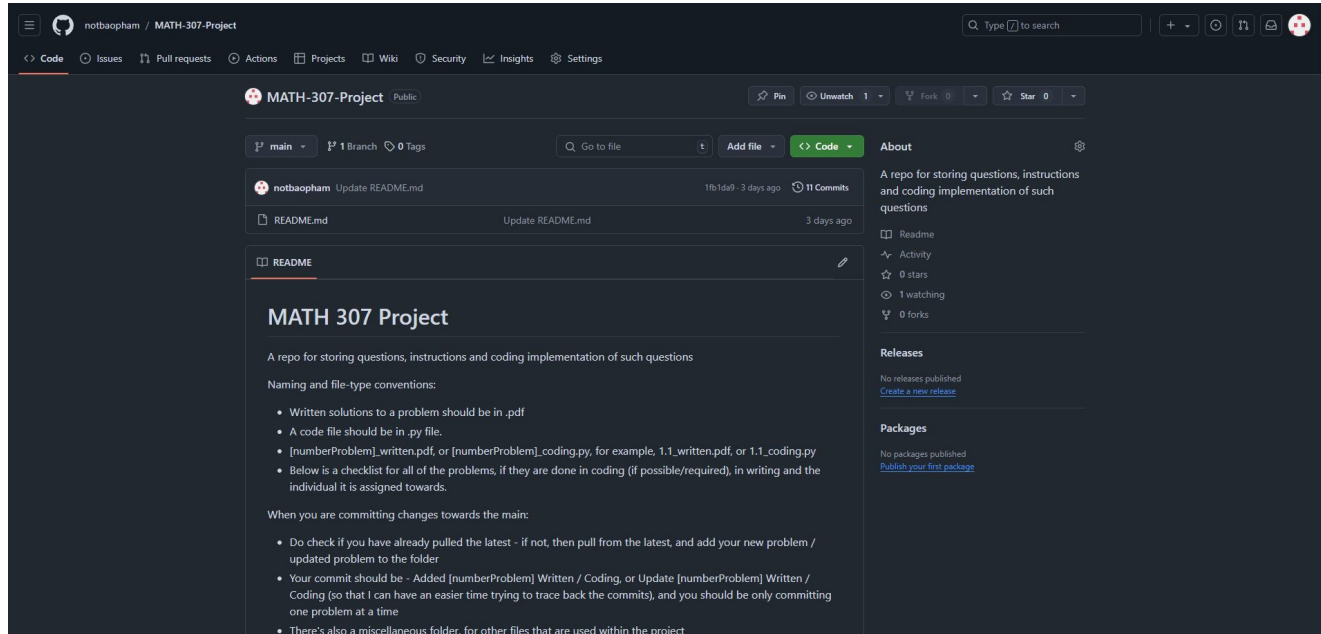

On your right side, is a search bar - search “notbaopham/MATH-307-Proj”\

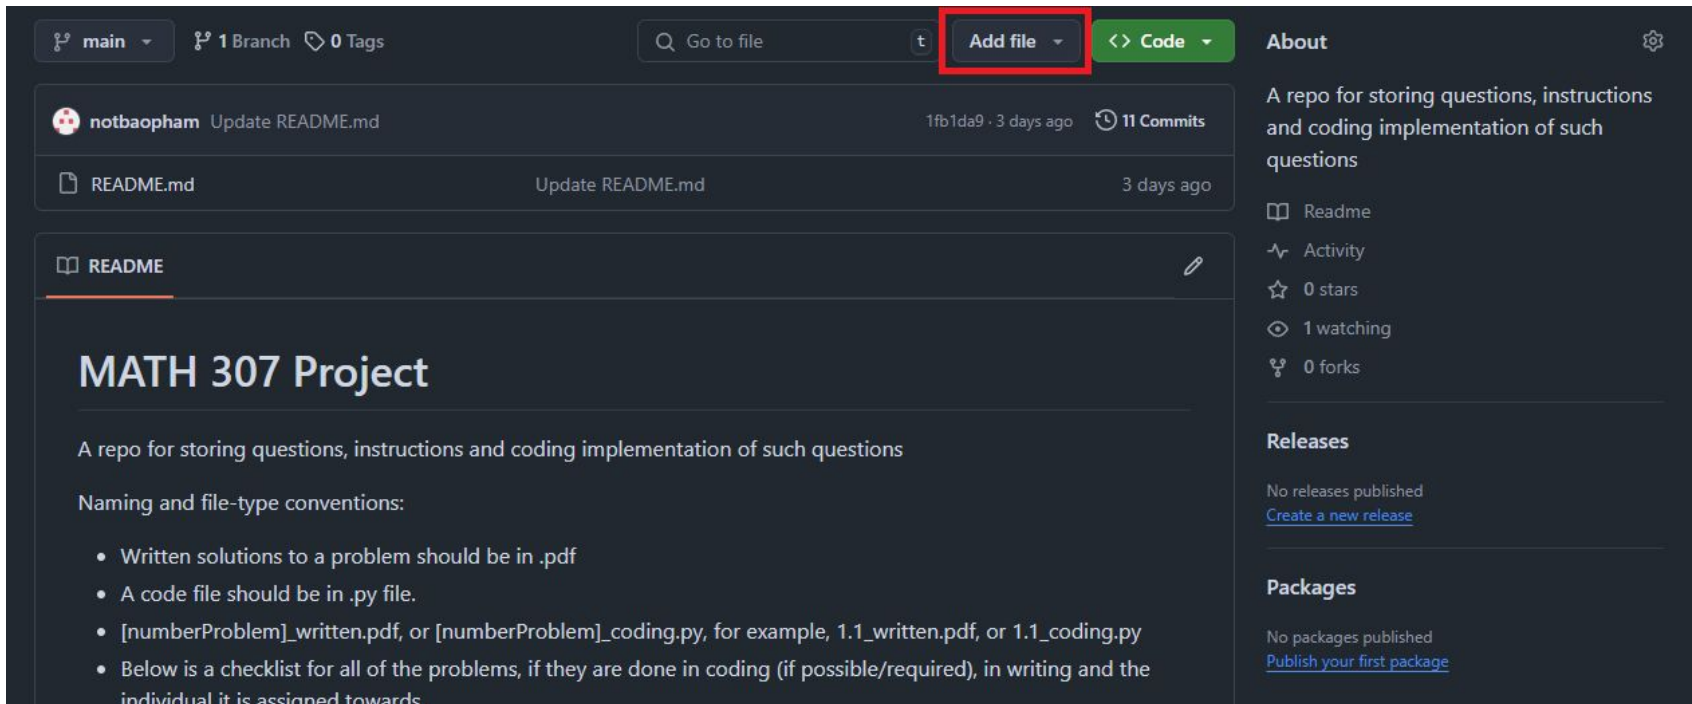

Click on the first link ^

If your screen looks like this - then you have successfully traversed to the repository. (Read the text in front of you to make it easier for me to congregate and sort the files - you can also scroll down to see a list of tasks, done or not done, by whom)

To add a new file (answer to a problem) - click:

The screenshot shows the GitHub interface for a repository named 'notbaopham'. At the top, there's a navigation bar with 'main' branch selected, '1 Branch', and '0 Tags'. A search bar 'Go to file' is present. The 'Add file' button is highlighted with a red box. To its right is a green 'Code' button. Below the navigation bar, a commit history shows 'Update README.md' by 'notbaopham' 3 days ago. The main content area displays the 'README' file, titled 'MATH 307 Project'. The README text describes the repository's purpose: 'A repo for storing questions, instructions and coding implementation of such questions'. It also lists naming and file-type conventions for solutions and code files. The right sidebar contains 'About', 'Releases', and 'Packages' sections.

README

MATH 307 Project

A repo for storing questions, instructions and coding implementation of such questions

Naming and file-type conventions:

- Written solutions to a problem should be in .pdf
- A code file should be in .py file.
- [numberProblem]_written.pdf, or [numberProblem]_coding.py, for example, 1.1_written.pdf, or 1.1_coding.py
- Below is a checklist for all of the problems, if they are done in coding (if possible/required), in writing and the individual it is assigned towards.
